68U075 MRI Compatible Adaptor for Tree Shrews

For PET/CT brain imaging of animals, it is difficult to hold the head firm and stable, while keeping the animal under anesthesia. Based on PET/CT imaging requirements, a special adaptor was developed for holding the head of tree shrews firm and stable with high quality non-metallic materials. Also this adaptor has a gas mask to anesthetize the animal while imaging. The Tree shrews can wake up in 2-5 minutes after the experiment.
