

**CARFIL QUALITY**  
YOUR SUPPLIER FOR ALL LABORATORY NEEDS

## Carfil BCell 8/8

### Features

|                             |                                                                       |
|-----------------------------|-----------------------------------------------------------------------|
| Material                    | Cellulose                                                             |
| Appearance                  | Squares of 8 mm                                                       |
| Average particle size       | $\geq 7$ mm                                                           |
| Bulk density                | 155 - 190 g/L                                                         |
| Dust content (< 200 $\mu$ ) | < 0,1 %                                                               |
| Moisture                    | 9 %                                                                   |
| Water absorbency*           | Average 360 %                                                         |
| Absorption speed**          | 3 sec                                                                 |
| pH-value                    | 6,1                                                                   |
| <b>Packaging:</b>           |                                                                       |
| Standard                    | - Autoclavable bag of 9 kg<br>- 45 bags per plastic europalet         |
| Irradiation 10 kGy          | - Sealed, double packaging of 9 kg<br>- 45 bags per plastic europalet |

\*100 ml beaker glass, filling up to 15 ml + 10 ml water

\*\* (output weight sieve mass) / mass\*100 = water binding capacity
