## Multi Face Mask

## Features

- Allows to have 4 mice kept under anesthesia simultanously
- Each mouse is placed with its snout directly into the face mask
- The multi face mask is delivered with stoppers that can seal the cones shut
- Om the opposite of the openings for the mouse, the Multi facemask has four (4) connections for face masks with tubing. Thus making it possible to connect 4 rat facemasks with tubing. It is also possible to have 4 facemasks for mice connected if you want place the animals a bit further apart from eachother
