Needles, Huber Point

Huber Needles Non-Coring Needles

Huber Needles are designed with a deflected or offset 'B' bevel point. This tip has the advantage of parting rather than cutting the silicone septum of a Vascular Access Port or injection site. This eliminates coring, preserving the integrity of the septum. PosiGrip 90° Huber Point Needles (see below) and Huber Point Right Angle and Tether Infusion Sets are available.

The bevel of the Huber point needle, the ground surface of the needle or cutting edge, is almost perpendicular to the needle shaft, deflecting the pressure from the heel, allowing the needle to part rather than core the septum as it is inserted and withdrawn.

PosiGrip Huber Point, Non-Coring Needles

Feature an architecturally contoured "B" bevel needle tip and a unique knarled hub. This hub provides positive grip action when attaching the needle to a syringe or luer lock. The PosiGrip hub is color coded for easy gauge identification. Needles ship sterile (EtO) in boxes of 12.

Injection caps, needleless injection sites, or microclaves can be attached to PosiGrip needles.

Ordering Information

Needle Gauge	Hub Colour	Needle length			
		1/2"	5/8"	3/4"	1"
25	Blue	PG25-50			
24	Purple		PG24-25		
22	Black			PG22-75	PG22-100
20	Yellow			PG20-75	PG20-100
19	Brown			PG19-75	

Add C to the catalog number for PosiGrip with injection cap.

Add BC to the catalog number for PosiGrip with safety or needleless injection site.
