Cahteters, CNC Series

Features

Catheters with or without connections

These sterile 60cm catheters are available in 1-9 French silicone and polyurethane with round, bevel or blunt tips. Polyurethane catheters are available with the Hydromer coating. Moveable suture retention beads are standard on all except the Hydromer coated polyurethane. Retention beads must be permanently fixed on Hydromer coated catheters. Connectors and modifications are available on request. See elsewhere for modifications.
