Contrafluran™ - Filter

Features

The patented Contrafluran™ Anesthetic Gas* Scavenging Filter consists of solid materials, distinguished by their rugged grain structure, extensive surface area and high micro- porosity.

This highly porous internal structure adsorbs efficiently and retains anesthetic gas components selectively from the exhaled- or un used anesthetic gas as it passes through the filter.

The storage capacity of the CONTRAfluran Anesthetic Gas Scavenging Filter is ca. 400gr and the flow resistance is with a $\leq 1,5\text{mm wc}$, **VERY LOW!**

LED holder for contraflurane filter

The filter can easily be attached to the flowmeter/vaporizer stand or on a separate rail, with the help of the SENSOfluran™, a mount integrated with a visual FILL-LEVEL-CONTROL-UNIT.

The differently colored LEDs (green, yellow, red) of the Sensofluran Mount indicate the quality of the filtered expired gas and thus the fill level of the filter.

LED;

The filter cleans the expired gas and has still sufficient free capacity.

LED:

The capacity of the filter diminishes. A filter change is recommended when the second yellow LED lights up.

LED:

The capacity of the filter is exhausted. The used filter must be replaced by a new one.

Due to legal reasons the device must be sent to UNO in a period of 12 months for calibration.

Ordering number

Ordering number	Product	Weight	Storage Capacity	Flow resistance	Volume
180000138	Contraflurane Filter	approx. 400gr	approx. 1.000 gr	≤ 1,5 mm WK	2 L
180000139	LED holder for contraflurane filter	/	/	/	/
